HOW IT WORKS

Welcome Arun!

Parameters

M/35yrs/5'10"/88kgs

Your Score

You are at a higher risk for COPD than other diseases. You scored lower than 60% of the 80,000 people in your age group!

Risk Profile

696

Score Distribution

COPD, 12%	Heart Disease (MI), 29%
Chronic Kidney Disease, 24%	Diabetes, 35%

BMI	Exercise	Smoking
Drinking	Sleephours	FBS, PPBS
Pulse	Body Age	Body Fat
BP		

BMI	Exercise	Smoking	Drinking	Sleephours
<p style="font-size: 2em; font-weight: bold;">33.2</p> <p>Moderately Obese</p>	<p style="font-size: 2em; font-weight: bold;">>1 hour</p> <p>Regular</p>	<p style="font-size: 2em; font-weight: bold;">Smoker</p> <p>Occasional</p>	<p style="font-size: 2em; font-weight: bold;">Drinker</p> <p>Occasional</p>	<p style="font-size: 2em; font-weight: bold;">6hrs</p> <p>Adequate</p>
<p style="font-size: 2em; font-weight: bold;">> 25%</p> <p>Of people diagnosed with diabetes are overweight</p>	<p>Regular exercise increases good cholesterol and reduces cardiovascular risks</p>	<p>Smoking occasionally is no safer! It increases risks for COPD, Lung Cancer and Heart Attack or Stroke.</p>	<p>Alcohol blocks fat oxidation so food taken while drinking should be carb free and protein rich</p>	<p>Sleeping late each night reduces deep sleep hours and increases health risks associated with sleep deprivation</p>
